

## Assumption Change Control Sheet

<b>Test</b>	4a, 4b Standby Tests
<b>Assumption</b>	26. Duration of standby tests

Change Originator	MC
<b>Change Request No.</b>	016
Date of Request	17/12/2019
Proposed Change to Assumption?	<b>No</b>

### Proposed Approach

Retain current 8 hour length of standby test.

### Rationale (underlying basis for assumption)

The Swedish Test is until 'steady state conditions have been reached for at least 3 hours' but with a maximum of 6 hours. To save having to assess 'if steady state conditions have been reached', as the VWARD calculation was designed on a set standby test period, and as RISE indicated it was no problem leaving the test running overnight a fixed 8 hour test period was chosen. To date there have been no requests to change the test period.

### Impact of Change (e.g. implications for test rig)

N/A
