

THE BESA GUARANTEE

By using a BESA member, you can be sure that your building engineering services contractor meets the required standard in all of the following ways:

REGULARLY INSPECTED

Members of the BESA are subject to regular third-party inspection and assessment of their technical competence and commercial capability.

FINANCIALLY EVALUATED

The commercial and financial standing of all BESA members is independently evaluated.

COMMERCIAL STANDARDS

BESA members are able to demonstrate that they operate according to fair and reasonable commercial standards.

PERFORMANCE CRITERIA

Members of the BESA are required to perform according to criteria established by a range of industry recognised specifications and good practice guides.

HEALTH & SAFETY

BESA members must adhere to robust health and safety policies and procedures, and must promote a positive safety culture throughout their organisation.

MANDATORY HEALTH & SAFETY

Members of the BESA comply fully with the mandatory health and safety requirements contained in the Construction (Design and Management) Regulations.

REGULATION COMPLIANT

There is a requirement on BESA members to prove that they have controls in place to ensure that their work complies with all aspects of the Building Regulations.

MANDATORY INSURANCE

BESA members must have in place adequate employers' and public liability and professional indemnity cover.

ENVIRONMENTAL AWARENESS

Awareness of environmental issues and an ability to manage elements such as waste, pollution, recycling and materials procurement is a requirement for all BESA members.

RECRUITMENT & TRAINING

All BESA members have in place adequate policies in relation to personnel recruitment, selection, education and training.

THE MESSAGE IS SIMPLE:
Always use a BESA member for your building engineering services requirements.
